How to Deploy the Rad Pro Calculator for Pocket PC CAB File

The zip file that you download contains two files, this file that you are reading and a CAB installation file. You must extract the CAB file from the zip file and move it onto your PDA. **Caution: Do not unzip the files in the CAB file!** The entire CAB file must be moved to your PDA, intact. Your PDA knows that a CAB file is a program installation file. Transfer the CAB file using ActiveSync or whatever sync program that you use for your Pocket PC. Find the transferred CAB file on your Pocket PC and tap it. The software will deploy. After deployment, delete the CAB file. Find the trefoil icon for the application and tap it. If you get the .NET Compact Framework 2.0 error, then go back to Rad Pro Calculator online and get the appropriate file:
